Oil Canning is an inherent part of light gauge cold formed metal products, it's an aesthetic issue and is not a cause for coil, sheet, trim, or panel rejection. Colors and sizes can change without notice.

## Enviro-Guard™ Description

The finest in pre-finished metal roofing is Enviro-Guard™. This premium quality SMP paint system is mixed with the Enviro-Guard™ protectant which fills up microscopic cavities to create a smooth surface. Preventing degrading water penetrations from reaching the primer results in a longer lasting paint.

## Color Samples

Colors shown represent the actual color as closely as is possible. Actual metal samples are available upon request free of charge.
